AEROCK

AEROCK – Uncompromising **Heating** for Your Business

AEROCK offers water fan heaters that effectively provide thermal comfort in various environments, including:

- Production halls
- Warehouses
- Car workshops and garages
- Small and large retail stores
- Sports venues
- Event facilities

AEROCK is fast, smart, solid and stylish, just like your business.

In heating, as in your business, there is no room for compromise.

Discover the **AEROCK R SERIES** – a water fan heater tailored to your needs.

AEROCK represents power that guarantees efficient heating even in demanding conditions. It's a solution you can rely on.

HEATING POWER

Depending on the chosen model, the heater generates heating power from **21 to 94 kW**.

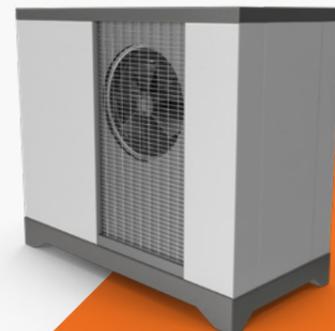

MAXIMUM AIR FLOW RATE

The diffuser's design is perfectly matched with the fan, ensuring full utilization of the air flow rate. One heater can provide heating for a space of up to **200 m³** or can circulate up to **5,800 m³** of air per hour.

DEDICATED FOR HEAT PUMPS OR CONDENSING BOILERS

The expansion of **AEROCK's** product range with the **Aerock MINI R3** (three-row heat exchanger) and **Aerock R4** (four-row heat exchanger) models, available with **AC** and **EC** motors, aims to enable the use of these devices in low-temperature heating systems. The larger heating surface of the exchangers, due to the increased number of rows, allows for cooperation with heating factor generated by systems that include heat pumps or condensing boilers.

The geometry of the exchanger ensures low pressure drops in the flow of the heating factor and a high temperature rise of the supplied air.

Modern technologies, energy consumption optimization, and functionality make AEROCK heaters the perfect choice for contemporary companies.

WiFi CONTROL

Remote control through a dedicated app on your smartphone or tablet allows you to turn the heater on or off, adjust the temperature, and set operating schedules. Complete control over your heating system is always at your fingertips.

ENERGY-EFFICIENT EC MOTORS

Highly efficient EC motors generate significant energy savings. The motor adjusts its speed based on demand, optimizing use of energy.

AIR GUIDES

You can easily and quickly control both the width and direction of the warm air stream. Seven tilting angles for each guide maximizing control and flexibility for optimal air blow direction.

Made from the highest quality materials, AEROCK heaters are designed to meet the high demands of your business for years to come.

DURABLE CASING

The heater's casing is made of ABS, a material known for its high resistance to mechanical damage. It is also heat resistant and does not corrode. The aging protection of the plastic is achieved through the use of UV-resistant additives. The casing effectively transfers all heating power to your space.

HEAT EXCHANGER

A sturdy frame, copper tubes, and collectors with brass connections guarantee reliable operation of the heater's core.

Additional, hidden locknuts in the top and bottom parts of the heat exchanger frame allow for installation using mounting studs in either vertical or horizontal positions.

Additional valves in the collectors for venting or removing the fluid from the exchanger enable maintenance and ensure proper functioning of the unit for years.

EFFICIENT MOTOR

Electronically commutated EC motors maintain nearly constant efficiency across the entire speed range, leading to reduced energy consumption and lower load on the electrical network. The motor adjusts its rotational speed based on the load throughout its working range. The motor control system protects the network from uncontrolled increases in power consumption both during continuous operation and at startup.

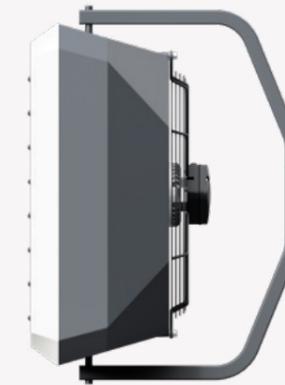

3-YEARS WARRANTY

Choosing **AEROCK** heaters means peace of mind and confidence that your investment will pay off for many years.

AEROCK embodies elegance and style in every detail, igniting the imagination and transforming your space into a unique and warm environment!

SMOOTH CASING

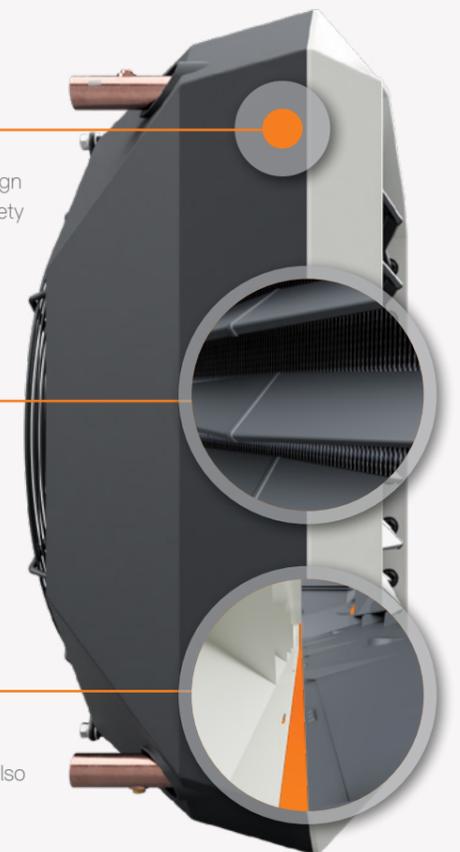

Subtle edges and sleek corners give the device an elegant character. This design not only enhances the aesthetic appeal of the units but also increases their safety by reducing the risk of damage.

AERODYNAMIC SHAPE

The air guides are designed to seamlessly integrate with the unique design of the unit while minimizing air resistance to increase system efficiency and optimally direct the distributed air.

CLICK CONNECTORS

The invisible connections between the front of the casing and the heater body maintain a consistent shape and harmony in the product's appearance, while also allowing for inspection access.

FOUR-ROW HEAT EXCHANGERS

ENERGY-EFFICIENT AND QUIET EC MOTORS

SMART AND ADVANCED WiFi CONTROL

3-YEAR WARRANTY

COPPER CONNECTORS IN THE HEAT EXCHANGER

MODERN DESIGN

AEROCK R AC

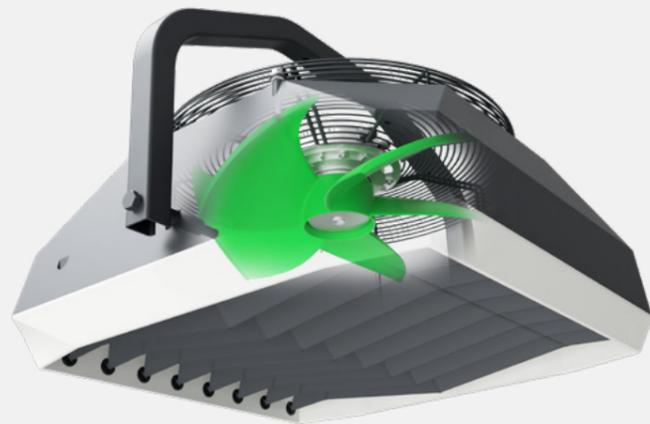

Water fan heater with AC motor
COMPETITIVE PRICE AND SIMPLE CONTROL

- Efficient three-speed motor
- Effective heating in the range of 5-100 kW
- Easy installation and quick connection
- Quiet operation
- Simple control
- Competitive price
- Mounting console included

AEROCK R EC

Water fan heater with EC motor
HIGH EFFICIENCY AND SMOOTH REGULATION

- High-efficiency EC motor
- Effective heating in the range of 5-100 kW
- Smooth regulation 0-10V
- Quiet operation
- Advanced control
- Handles up to 10 devices with one controller
- Mounting console included

AEROCK RD AC/EC

Air destratifier with AC or EC motor
MAXIMUM ENERGY SAVINGS

- Quiet operation
- Advanced control
- Easy installation
- Competitive price

VERSION WITH **AC** MOTOR

1. Power supply 230V/50Hz
2. Main switch, fuses
3. Wall controller for 3-speed AC fan
4. Valve with actuator 3/4"
5. Fan with AC motor

A - Connection 2-5 on AC wall controller: operation dependent on thermostat
 B - Connection 4-5 on AC wall controller: operation independent of thermostat

*Maximum number of devices connected to one 3-speed AC wall controller:
 4x MINI R2, MINI R3, MINI RD, 2x R1, R2, 1x R3, R4, RD

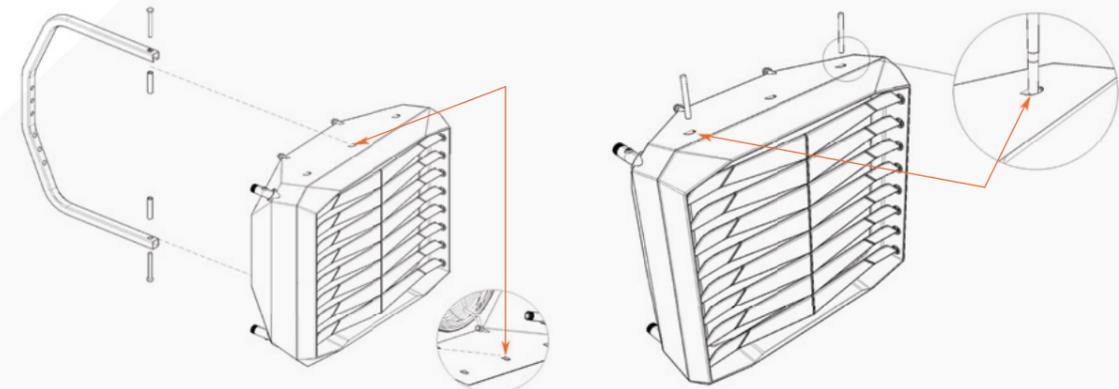

VERSION WITH **EC** MOTOR

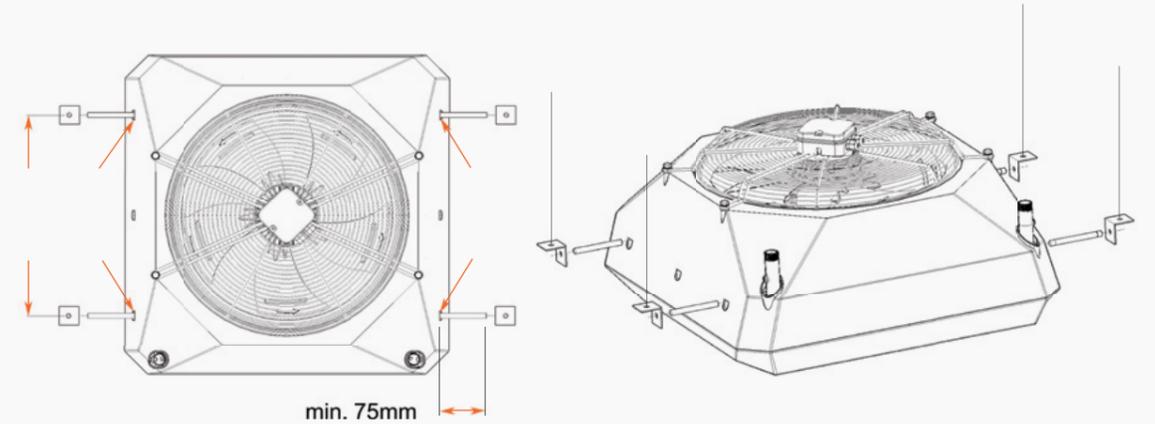

1. Power supply 230V/50Hz
2. Main switch, fuses
3. Controller for EC fan (0-10V)
4. Temperature sensor NTC for EC controller (0-10V)
5. Valve with actuator 3/4"
6. Fan with EC motor

*Maximum number of devices connected to one 0-10V EC wall controller:
 10x MINI R2, MINI R3, MINI RD, R1, R2, R3, R4, RD

VERTICAL ASSEMBLY ON A MOUNTING BRACKET OR MOUNTING STUDS

HORIZONTAL ASSEMBLY ON MOUNTING STUDS

Legend:

- Tz - Temperature of the supply water to the device
- Tp - Temperature of the return water from the device
- Tp1 - Inlet air temperature to the device
- Tp2 - Outlet air temperature from the device
- Pg - Heating capacity of the unit
- Qp - Airflow rate
- Qw - Water flow
- Δp - Pressure drop in the heat exchanger

* Reference conditions: room volume 1500 m³, measurements taken at a distance of 5 m ** Power consumption at an electrical supply voltage of 230V AC *** Electric motor power for the above fan efficiencies **** pomiar w warunkach laboratoryjnych

Legend:

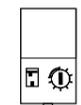

- T_z - Temperature of the supply water to the device
- T_p - Temperature of the

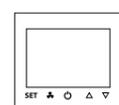

Wall controller for 3-speed AC fan

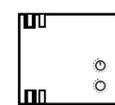

On/off wall thermostat

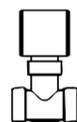

Regulator ARW 3.0/2

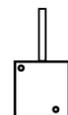

HMI controller with WiFi for EC fan (0-10V)

Potentiometer with thermostat for EC fan (0-10V)

Two-way valve with actuator 3/4"

NTC temperature sensor for EC controller

| Mounting Method | Wall-mounted | --- |
| Max. Signal Wire Length | --- | 100m |

MAXIMUM NUMBER OF DEVICES THAT CAN BE CONNECTED TO OUR CONTROLLER

| | | | | | |
|--|---|---|---|----|----|
| AEROCK MINI R2 / MINI R3 / MINI RD pcs | 4 | 4 | 4 | 10 | 10 |
| AEROCK R1 / R2 pcs | 2 | 2 | 2 | 10 | 10 |
| AEROCK R3 / R4 / RD pcs | 1 | 1 | 1 | 10 | 10 |

PACKAGING

Each device is packed in high-quality cardboard.

Number of devices per pallet:

R1 - R4 - 9 pcs

MINI R - 16 pcs
